俊和創科品牌 Inno@ChunWo 研究技術 R²M² 於「日內瓦國際發明展」 獲得「Gold Plus」獎項

R²M² Garners "Gold Plus" Award at Geneva International Exhibition
of Inventions

亞洲聯合基建成員俊和發展集團有限公司（「俊和」）聯同香港科技大學、納米及先進材料研究院有限公司（「NAMI」）共同研發的快速修補砂漿材料（R²M²），於 3 月份舉行的日內瓦國際發明展獲得「Gold Plus」獎項。

R²M² 是俊和旗下創科品牌「Inno@ChunWo」的重點研究成果之一，是一種不鏽鋼強化修補砂漿，針對石屎剝落這種建築物老化的常見問題。此技術可以快速修復剝落，亦比傳統修復方法製造較少噪音及建築廢物等。

日內瓦國際發明展每年於瑞士舉行，是世界上舉辦歷史最長，規模最大的發明展。鑑於疫情關係，今年展覽改為於網上進行。在 600 個來自世界各地的發明中，只有 24 項能獲得「Gold Plus」的榮耀，此獎項肯定了 R²M² 的原創性及實用性，亦同時證明了俊和在開發創新科技的實力。

The Rapid Repairing Mortar Material (R^2M^2), that was jointly developed by Chun Wo Development Holdings Limited (“Chun Wo”), a member of AAI, with the HKUST and Nano & Advanced Materials Institute (“NAMI”), has garnered the “Gold Plus” award at the Geneva International Exhibition of Inventions that was held in March.

R^2M^2 , which is one of our major innovation projects under our innovation brand “Inno@ChunWo”, is a stainless-steel fibre reinforced mortar that pinpoints the problem of spalling concrete, a common issue in ageing buildings. It is a safer and faster solution that produces less construction noise and waste than traditional repair methods.

The Geneva International Exhibition of Inventions, held in Switzerland every year, is the biggest exhibition of inventions and the longest history in the world. Due to the pandemic, the expo was held online this year. Only 24 out of 600 exhibited inventions from across the world were honoured with the “Gold Plus” award. This achievement affirms the originality and practicability of R^2M^2 , and proves Chun Wo’s ability to develop innovation technologies.
